

FT334 Pulldown

Product Specifications

Unit Weight	824 lbs (375 kg)
Height	94 in (239 cm)
Width	68 in (173 cm)
Length	53 in (135 cm)

Weight Stack	Standard 200 lbs (91 kg) 1:2
--------------	------------------------------

Standard

Seat Ratchet System •

Options

Stack Shroud	•
Add-On Weights	•
Rubber Feet	•
Heavy Weight Stack	250 lbs (114 kg) 1:2

FT660 Total Leg

Product Specifications

Unit Weight	450 lbs (205 kg)
Height	63 in (160 cm)
Width	36 in (91 cm)
Length	51 in (130 cm)

Weight Stack	Standard 200 lbs (91 kg) 1:4
--------------	------------------------------

Options

Stack Shroud	•
Add-On Weights	•
Rubber Feet	•

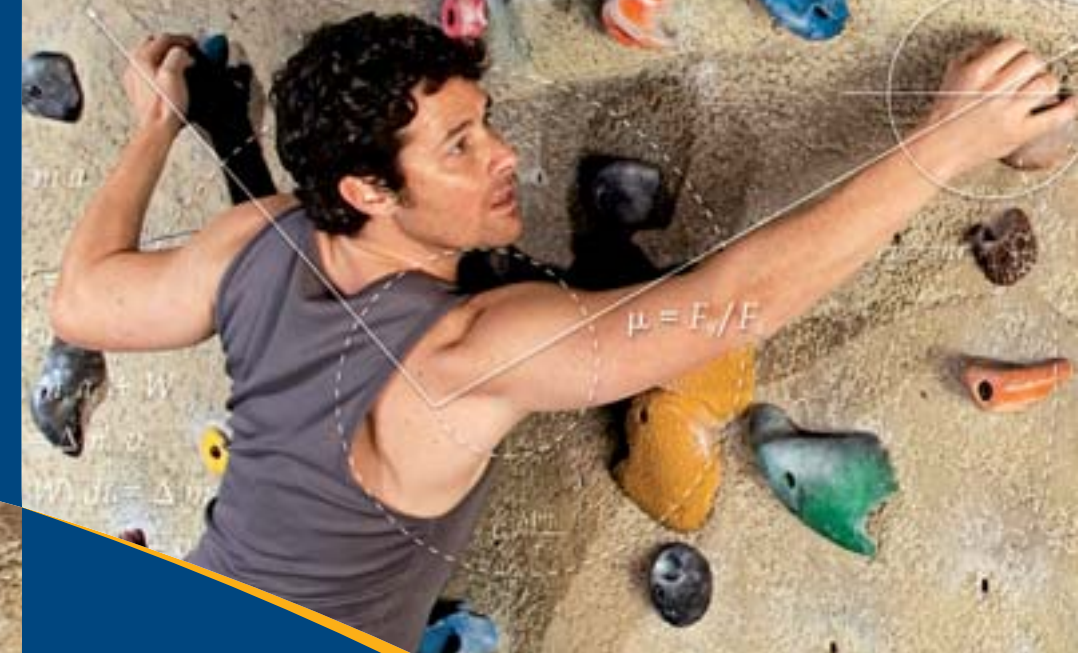

PRECOR USA

ICARIAN
LINE

User Defined Selectorized Line

Your workout, defined by you.
Engineered to move the way you move.

The Precor strength line.

The Precor strength line is designed with the same beauty, artistic vision and attention to detail you've come to expect from the cardio leader. Durable and easy to use, the complete line is, like all Precor equipment, smooth and fluid, based on the motion of the human body. It's engineered to move the way you move, to work the way you work, providing a better, more positive exercise experience.

User Defined Motion

User defined motion. Natural motion. Functional training. It goes by many names, but Precor User Defined equipment is different. Featuring a dual-independent stack system, you get real, dedicated resistance with true isolateral movements. The user defined path allows multiple angles and independent movement, while the dual stack means small incremental adjustments, so it's perfect for deconditioned users, fitness enthusiasts and athletes alike. In short, you move the way you want to, and the number of exercises that can be performed is limited only by the imagination.

Adjustable Crossover (407B)
 Chest (FT444)
 Functional Training System (FTS)
 Multi-Gym (820)
 Pulldown Independent (FT334)
 Row (FT332)
 Shoulder (FT555)
 Total Leg (PT660)
